

Program Overview

Transportation needs in the Upper Savannah region are as varied as the communities represented. The small urban centers of Greenwood and Laurens are challenged to improve quality of life while providing needed mobility services to their citizens. Rural Edgefield County is rapidly becoming a bedroom community for the Aiken/Augusta area and is attempting to deal with the associated growth pressures. Small towns such as Calhoun Falls and Saluda seek assistance in funding sidewalks and addressing safety issues at intersections. Each of these issues is directly associated with transportation planning, and Upper Savannah Council of Governments has been actively involved with these projects.

Upper Savannah's transportation planning program involves consideration of the following principles:

- Ensure the safe and efficient movement of people and their vehicles in the region
- Involve the public and their elected representatives in the planning process
- Improve the efficient management of limited transportation resources
- Encourage responsible environmental stewardship in all projects

Financial assistance from the South Carolina Department of Transportation supports these activities at Upper Savannah Council of Governments (USCOG).

As the designated planning agency, USCOG is responsible for maintaining and creating plans for the entire region, maintaining financials records of the support funds, and sending recommendations to SC DOT. The USCOG Board of Directors is made up of representatives from each county and serves as the transportation policy advisory committee for the region. Most board members are elected officials in their communities, but some members are lay citizens. Each county council nominates a certain number of representatives to the USCOG Board based on population.

There is no designated Metropolitan Planning Organization (MPO) in the region due to the lack of a concentrated area of population. USCOG serves as the planning entity for all transportation activities in the counties of Abbeville, Edgefield, Greenwood, Laurens, McCormick, and Saluda. Census 2010 recorded the population for the entire region at 218,708.

Regional Overview

Population – 2010

		<u>% Change 1990 – 2010</u>
Abbeville County	25,417	7%
Edgefield County	26,985	47%
Greenwood County	69,661	17%
Laurens County	66,537	15%
McCormick County	10,233	15%
Saluda County	<u>19,875</u>	<u>22%</u>
Upper Savannah Region	218,708	18%

SC Highway 81	Abbeville County

Public Transit Providers: Edgefield County Senior Center, McCormick County Senior Center

***Work Element I: Coordination Efforts to Develop
Performance Management Strategies***

Purpose: To provide transportation and transit related planning assistance to all local governments in the Upper Savannah region and to strengthen the regional partnership with SC DOT

Project History: Upper Savannah Council of Government has partnered with South Carolina Department of Transportation to build and maintain regional traffic models, the regional Transportation Improvement Plan, a transit coordination study, and the completion of various enhancement grants.

Task: Continue to serve as a clearinghouse for transportation related information in the Upper Savannah region of South Carolina. Maintain and build partnerships with the SC DOT and work to assist them in projects on the regional level.

Outcome: USCOG staff will continue to act as a regional resource for staff at SC DOT. At the same time, USCOG staff will continue to draw upon the experience and expertise of the SC DOT staff to respond to transportation issues.

<u>Budget:</u>	<u>SC DOT</u>	<u>Local</u>	<u>% of Total RPWP</u>
	\$17,000	\$4,080	10%

Work Element II: Transportation Improvement Priorities

Purpose: Based on the findings of the regional traffic model, work with SC DOT staff to define and prioritize transportation improvement needs in the Upper Savannah region based on safety and security needs.

Project History: Upper Savannah Council of Governments and the South Carolina Department of Transportation have worked together for many years to review traffic model information and conduct site visits to roads to determine areas in need of improvement.

Task: Based on the update of the long range plan and the traffic model, review roads in need of improvement. If necessary, visit these sites and provide further data to SC DOT staff as necessary. Develop a list of potential projects, estimated costs, and project completion time for use by the Upper Savannah Board of Directors as they review recommendations for regional road improvements to be sent to SC DOT commissioners.

Outcome: With up-to-date information backed up by the scientific analysis of the traffic model and the expertise of the SC DOT staff, the Upper Savannah COG Board of Directors will be able to make educated and informed recommendations for road improvements in the region. The priority list developed from this process will be used during board meetings, public hearings, or other gatherings as needed.

<u>Budget:</u>	<u>SC DOT</u>	<u>Local</u>	<u>% of Total RPWP</u>
	\$34,000	\$8,160	20%

Work Element III: Consultation with local elected officials

Purpose: To gather local input on needs and priorities on the transportation system in the Upper Savannah region in order to create a safe and efficient multi-modal travel network.

Project History: Upper Savannah Council of Governments was created to encourage local governments to work together in pursuing common regional goals. The USCOG board is made of up elected and non-elected representatives from each county. Staff members rely on these board members to give input on projects, but also to recommend other citizens to speak with, to suggest locations for public hearings, and to a general local contact in each county.

Task: Continuing the on-going efforts to consult local elected officials on a regular basis concerning transportation improvements is crucial to the overall transportation planning program effort at Upper Savannah. Meetings are held with local elected officials in their counties on a regular basis. Informal discussions are also held very frequently to discuss transportation needs. Keeping elected officials informed and responding to their requests for information make the entire planning process go more smoothly.

Outcome: Emphasizing communication and connection to local elected officials has been an important part of the USCOG planning program at all levels. By meeting with county officials on a regular basis, you learn their concerns and also share information that they can take back to their constituents. Local officials recommend other important community leaders, the best time or place to hold public hearings, and provide basic but crucial support to the regional planning program.

<u>Budget:</u>	<u>SC DOT</u>	<u>Local</u>	<u>% of Total RPWP</u>
	\$34,000	\$8,160	20%

Work Element IV: MAP-21 Implementation

Purpose: Federal requirements and grant opportunities will require local and state governments to document and move towards creating plans to promote more cost efficient and environmentally responsible development patterns.

Project History: Many communities are taking it upon themselves to plan for more cost efficient and effective development that requires less long-term financial support.

Task: Evaluate current planning processes related to the passage of MAP-21 (Moving Ahead for Progress in the 21st Century Act) and planning considerations such as livability, sustainability, climate change, and goods movement.

Outcome: As livability and sustainability are still terms in development, we will monitor how the terms are defined and research grant opportunities that will be available for our region. At the end of this fiscal year we should have a better understanding on what the federal government will require for potential grants and we will begin putting plans in place to ensure the region meets those basic qualifications.

<u>Budget:</u>	<u>SC DOT</u>	<u>Local</u>	<u>% of Total RPWP</u>
	\$34,000	\$8,160	20%

Work Element V: Public Involvement

Purpose: Continue to involve the public on actions related to the long-range plan and the Transportation Improvement Plan.

Project History: As federal requirements require opportunities for public input, USCOG and SC DOT have partnered in the past to host public hearings in affected communities.

Task: A plan will be created that will guide the public involvement process in planning for transportation projects in the Upper Savannah region. Special attention will be given to groups not usually participating in the transportation planning process.

Outcome: By using the resources from current staff at USCOG and SC DOT, along with the potential for using a consultant as a back-up, our transportation program will continue to work to insure that the public has every opportunity to comment on proposed projects.

<u>Budget:</u>	<u>SC DOT</u>	<u>Local</u>	<u>% of Total RPWP</u>
	\$17,000	\$4,080	10%

Work Element VI: Long Range Plan Update

Purpose: Continue the process of updating the regional Long Range Plan to coincide with the update of the statewide Long Range Plan.

Project History: The update to the Long Range Plan will be developed to coincide with the update to the statewide Long Range Plan.

Task: In conjunction with SC DOT, a timeline and schedule will be developed to begin the process of updating the regional Long Range Plan according to the latest guidelines from the state and federal governments.

Outcome: By using the resources from current staff at USCOG and SC DOT, a timeframe for updating the Long Range Plan will be developed and plan updates will begin.

<u>Budget:</u>	<u>SC DOT</u>	<u>Local</u>	<u>% of Total RPWP</u>
	\$34,000	\$8,160	20%

Budget Summary

	<u>SC DOT</u>	<u>Local Match</u>	<u>% of Total RPWP</u>
Program I – Coordination Efforts	\$17,000	\$4,080	10%
Program II – TIP Maintenance	\$34,000	\$8,160	20%
Program III– Local Officials Consultation	\$34,000	\$8,160	20%
Program IV – MAP-21 Implementation	\$34,000	\$8,160	20%
Program V – Public Involvement	\$17,000	\$4,080	10%
Program VI- Long Range Plan Update	<u>\$34,000</u>	<u>\$8,160</u>	20%
Totals	\$170,000	\$40,800
